Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

thereby providing a cropped image; and

(e) providing the cropped image to [[a]]the display; wherein the image capture device is a digital camera.

- 8. (Previously Presented) The method of claim 7 wherein the step of cropping the image further comprises the step of:
 - (d1) resizing the image.
- 9. (Previously Presented) The method of claim 8 wherein the aspect ratio determining step
 (a) further comprises the step of:
 - (b1) determining the aspect ratio of the image; and
 - (b2) determining if the aspect ratio of the image matches an aspect ratio of the display.
 - 10. (Canceled).
 - 11. (Previously Presented) The method of claim 7 wherein the display is an LCD screen.
 - 12. (Original) The method of claim 11 wherein the image is a scrennail image.
 - 13. (Previously Presented) The method of claim 12 further comprising the step of:
 - (f) updating the scrennail image with a higher resolution image.

14. (Previously Presented) The method of claim 13 wherein the step of updating the screennail image further comprises the step of:

- (f1) retrieving the higher resolution image;
- (f2) determining if the higher resolution image requires cropping;
- (f3) decompressing the higher resolution image;
- (f4) cropping the higher resolution image if the higher resolution image requires cropping; and
 - (f5) providing the higher resolution image to a display.
- 15. (Currently Amended) A system for correcting the aspect ratio of an image captured by an image capture unit comprising:

means rotating the image, if required, so that the image appears upright on <u>a display of</u> the image capture device;

means, coupled with the image rotating means, for determining if the image requires cropping;

means coupled to the determining means for decompressing the image if required;

means coupled to the decompressing means for cropping the image if the image requires cropping, thereby providing a cropped image; and

means coupled to the cropping means for providing the cropped image to <u>the</u> display; wherein the image capture unit is a digital camera.

16. (Original) The system of claim 15 wherein the decompressing means further comprise: means for decompressing and resizing the image.

4

17. (Original) The system of claim 16 wherein the determining means further comprise: means for determining the aspect ratio of the image; and

matching means coupled to the aspect ratio determining means for determining if the aspect ratio of the image matches an aspect ratio of the display.

- 18. (Original) The system of claim 17 wherein the display is an LCD screen.
- 19. (Canceled)
- 20. (Previously Presented) The system of claim 15 wherein the image is a scrennail image.
- 21. (Original) The system of claim 20 further comprising: means for updating the scrennail image with a higher resolution image.
- 22. (Original) The system of claim 21 wherein the means for updating the screennail image further comprise:

means for retrieving the higher resolution image;

means coupled to the higher resolution image retrieving means for determining if the higher resolution image requires cropping;

means coupled to the higher resolution image determining mean for decompressing the higher resolution image;

means coupled to the higher resolution image decompressing means for cropping the higher resolution image if the higher resolution image requires cropping; and

means coupled to the higher resolution image cropping means for providing the higher resolution image to a display.
